

# Codasip - Leading Provider of RISC-V Processors and EDA Tools for Their Customization

## RISC-V Processors

- Wide range pro RISC-V processor IPs
- Support for several ISA and microarchitecture modules
  - e.g., I, M, ..., B, P, **V**
- Starting from embedded to application class
- Fully verified
- Ready for differentiation/customization

## Codasip Studio

- A unique collection of tools for fast & easy modification of RISC-V processors
- Processor described in architecture description language *CodAL*
- Allows modification of:
  - Instruction set architecture (ISA)
  - Micro-architecture
